## INTRODUCTION

Sai sign tech started its activities in 2009, operating from a workshop in Mumbai. With constant growth and expansion through the years, the company had undertaken and successfully completed various projects. Having the requisite entrepreneurial spirit, team of professionals dedicated to quality construction façade work, design, planning and valuers of fixed assets has helped to adopt different market situations with ease and thus result in successfully completion of projects.

The distinctive 'Design and Engineering' capabilities developed by Sai Sign Tech are one of its main strengths. It is the key controlling factor of focus in the overall concept of the façade which is completely engineered by our in house team of designers and engineers who, along with our manufacturing and erection engineers, aid the architects and customers in realising their concepts.

Our latest facilities and experience workforce enable us to handle the projects of commercial industrial institutional grade and residential installation. Today we are poised as a total solution provider for all types of façade works

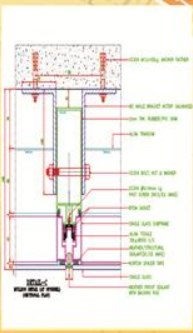

we undertake turn key projects for Cap Curtain Wall, Semi Unitized, Unitized and Suspended Spider Glazing, ACP Cladding, Dry Stone Cladding, Tensile Membrane Structures and M.S Structure.
